the basics by example. Most importantly it imparts on each participant enthusiasm and ideas that may be applied to their individual research goals.

### **Acknowledgments.**

The organizers of this years North American Dendroecological Fieldweek would like to thank Ms. Susan Fox of the USDA Forest Service Southern Global Climate Change Program for the financial support of this years program. Without the financial backing of the US. Forest Service over the past four years we could not have brought this program to as many places and people as we have. We also extend our sincere gratitude to Dr. Henry Wilber, Director of the Mt. Lake Biological Station and his staff for accommodating us so comfortably.

Finally we would like to thank the five invited group leaders, four guest speakers and two teaching assistants who volunteered their time and effort into making this years program the success it was: Dr. Malcolm Cleaveland, University of Arkansas; Dr.'s Steve Stevenson and Steve Adams, Fairmont State College and Lancaster Community College; Dr. Elaine Kennedy-Sutherland, USDA FS NEFES; Dr. Doug Larson, University of Guelph; Dr. Richard Phipps, University of Illinois; Dr. Mary Beth Adams, USDA FS NEFES; Dr. Henry Wilber, University of Virginia; Dr. Paul Van Deusen, USDA FS, SFES; Dr. Henri Grissino-Mayer and Connie Woodhouse, Laboratory of Tree-Ring Research, University of Arizona.
